

PRECETTI PTE LTD  
SINGAPORE

# FAR EAST AND PACIFIC

## Marine Refit and New Building

# FULL SERVICE CONTRACTOR IN MARINE REFITTING AND NEW BUILD PROJECTS

Precetti Pte Ltd is based in Singapore and launched in 2016 as the local business unit of Precetti Int. Group, a worldwide leading outfitting contractor for cruise ships, mega-yachts and ferries.

Precetti provides complete turn-key custom solutions (from designing to installation on board) either for new building and refitting projects, using advanced technologies to build and refit public areas, indoor and outdoor restaurants, cabins, suites and wet spaces on board.

Precetti offers a service active 24/7 for all the needs including repair and maintenance services, occurring on board of customer ships.

Precetti Pte Ltd Singapore has been created on the purpose to meet the needs of ship owners present in the Far-East and Pacific area and develop Precetti's business in that part of the world.

## PARTNERS AT WORK

# CRUISE SHIP SPECIALIST

Precetti Pte, the Far-East and Pacific business unit of Precetti Group, acts as a general contractor and engages the full production capabilities of the Group itself, including the customize high-quality furniture for Public Areas, Catering Areas, Accommodation and Cabins as well as Outdoor Areas on board of cruise ships.

Precetti offers a reliable customer service (after sales service), delivering quality products and projects on time and within the budget.

# THE REALITY OF A GLOBAL PARTNER

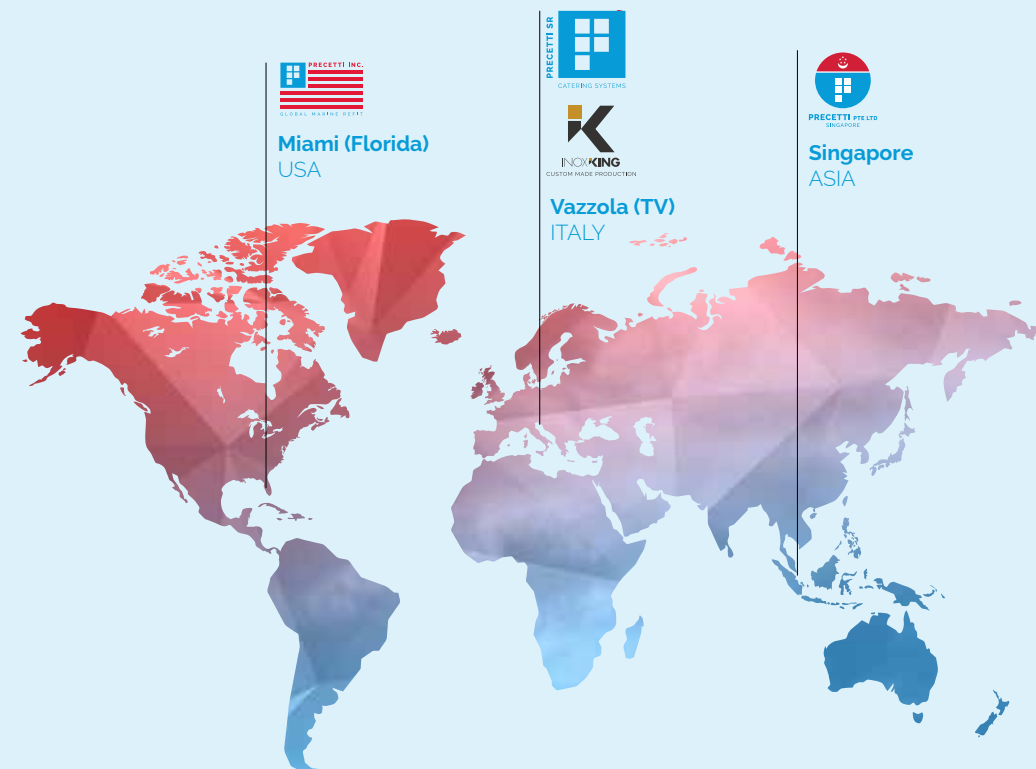

## Nothing short of Excellence

Precetti Group is the international marine contractor with more than 60 years of experience involved worldwide into both the refit and newbuilding segments.

Precetti provides turn-key tailored solutions on a global perspective, incorporating its own manpower to develop innovative solutions for its business partners, engaging its own vertical integrated production facilities in Italy for catering systems and no combustibile certified materials (B15 doors and panels for modular cabins, wet units, walls, ceilings etc.).

Precetti is able to take up the analysis, conceptual design, production, prefabrication, as well as project management and installation onboard ships and being a global marine contractor; the company maintains a physical presence on the most common areas.

In response to the important challenge brought forward by the significant rise on demand of the Asian Market, Precetti Group introduces three individual business units at USA, Europe and Singapore, the latter being represented by Precetti Pte. Thanks to this global presence, Precetti is able to offer a complete awareness of the local market and resources and an active service 24/7, providing fast and prompt responses upon request for inspections and even refurbishments. All units are bringing forward the vast experience of the Group under a common strategy and moto of "Nothing Short of Excellence".

# PRECETTI SERVICES

## Turnkey solutions

### Design

Exploiting the experience of the past, Precetti supports and assists clients and architects providing architectural drawings and developing new innovative solutions.

### Engineering

Following the architectural concept, Precetti high-qualified technical dept. develops the engineering and executive drawing to transform the ideas into practical solutions.

### Manufacturing

Starting from the shop drawings, Precetti's factory, using advanced technological production facilities and automated processes, develops customized elements, that later pre-assembled will become the final products.

### Project Management

Project Management is engaged at a starting point, not only to coordinate the design and manufactory aspects, but also from a planning, logistical (loading and unloading materials) and installation point of view.

### Installation

Installation onboard is executed by high-qualified manpower, under the guidance of a specified project management team composed by supervisors, project and site managers, always present in the entire course of the project.

### After Sales Services

A successful project is marked primarily by a satisfied customer during the delivery of the project, but also by the professionalism to support clients during vessel's daily operations.

# PUBLIC AREAS

Precetti is committed into bringing innovative solutions and using advanced technologies to successfully complete outfitting projects for public spaces, even in combination with the catering systems (restaurants, bars, buffet etc.), or any other public area on board of the ship, covering in addition complementary works, as piping, air conditioning, electricity, etc.

# CATERING AREAS

Precetti is a PHS certified company since 1981, that produces stainless steel catering solutions, using its own facilities and advanced technologies in Italy, in compliance with the latest standards of hygiene and safety.

The proactive design includes also all the necessary electrical and piping connections, to assure an easy adaptation of the end-product to the ship's existing steel structure and infrastructure, at the stage of the installation on board.

Stainless steel furniture can be produced with any kind of decoration and finishing, completed at the factory to avoid delay during restoration and to deliver a high-quality product.

# ACCOMMODATION AREAS

Precetti Italy is a B15 Certified Company, in position to produce non-combustible B15 elements, including ceilings, walls, pullman beds and doors.

Precetti Italy is one of the main suppliers of the naval certified B15 doors to the marine industry, running a standard contracted production of more than 6000 doors per annum, from the stainless steel plate to the end-product and even the distribution at the shipyards globally.
