De Wave has been established in January 2014 as a spin off of Demont S.r.l., an Italian Industrial Company headquartered in Northern Italy close to Savona, mainly operated in industrial and maritime plants and maritime interior business.

In the newly founded De Wave, Demont transferred all the activities in Marine Interior business (Cabins, Bathroom Units and Public Areas such as Main Theaters, Restaurants, Stairs, Sundecks, Atrium etc.) both in newbuilding and in refitting/maintenance.

In 2015, the Management team and Xenon Private Equity, a private equity fund leader in the investments in the small and medium company sector in Italy, have acquired 100 % of the share capital of De Wave with the objective to develop the Company globally and build a global leader in the Maritime sector.
